

Tanggungjawab Sosial Perusahaan

Corporate Social Responsibility

Perseroan melakukan tanggung jawab sosial atau Corporate Social Responsibility sebagai kegiatan yang terintegrasi dengan kegiatan operasional.

The Company carries out the social responsibility or Corporate Social Responsibility (CSR) activities as an integrated activity with operational activities.

CITA meyakini bahwa keberlangsungan usaha Perseroan tak terlepas dari dukungan masyarakat tempat operasional Perseroan berada. Bertolak dari keyakinan tersebut, Perseroan melakukan tanggung jawab sosial atau *Corporate Social Responsibility* (CSR) sebagai kegiatan yang terintegrasi dengan kegiatan operasional. CSR bukan sekadar kegiatan untuk terjun langsung ke tengah masyarakat dan menjadi bagian dalam keberhasilan mereka.

Sebagai perusahaan yang bergerak di bidang tambang, Perseroan banyak berinteraksi langsung dengan masyarakat dan lingkungan tempat Perseroan beroperasi. Melalui kegiatan CSR, Perseroan dan Entitas Anak dapat memberikan manfaat nyata bagi masyarakat dan lingkungan sekitar yang selama ini telah mendukung dan berkontribusi terhadap keberlangsungan bisnis CITA. Kegiatan CSR juga merupakan sarana Perseroan mendekatkan diri dengan komunitas lokal.

Tak bisa dipungkiri, perlambatan yang terjadi di sektor mineral dan batubara akibat pelarangan ekspor mineral mentah telah mempengaruhi kegiatan CSR Perseroan dan Entitas Anak. Ini disebabkan Perseroan menghentikan produksi dan kegiatan operasional lainnya selama periode tersebut. Dalam periode tersebut Entitas Anak hanya berkontribusi dalam program keagamaan, adat dan terbatas hanya di beberapa daerah tertentu.

CITA believes that the Company's business sustainability is inseparable from the support of the community where the Company operates. Based on this, the Company carries out the social responsibility or *Corporate Social Responsibility* (CSR) activities as an integrated activity with operational activities. CSR is not just a series of activities, but it has to be immersed into society and be part of their achievement.

As a mining company, the Company interacts with communities and its environment where the Company operates. Through CSR activities, the Company and Subsidiaries can provide tangible benefits to the community and its surrounding environment that has been supporting and contributing to CITA's business continuity. CSR activities are also a means to get closer to the local community.

The slowdown in the mineral and coal sectors due to the prohibition of the raw minerals export has undeniably affected the Company's CSR activities and Subsidiaries. This is relating to the Company discontinued its production and other operational activities during that period. During this period, the Subsidiary can only contribute to activities such as religious and traditional celebration in certain limited area.

Meskipun demikian, Perseroan terus berkomitmen untuk memberikan nilai tambah kepada masyarakat sekitar dan meningkatkan taraf hidup mereka.

Selama ini, kegiatan CSR Perseroan dilaksanakan melalui Entitas Anak. Kegiatan CSR ini meliputi program pendidikan, sarana dan prasarana, kesehatan, keagamaan, serta bidang sosial dan budaya.

Seiring dengan beroperasinya pabrik pengolahan dan pemurnian SGA serta prospek tambang ke depan, Perseroan berharap dapat melanjutkan kegiatan CSR yang bertujuan memajukan kehidupan masyarakat. Di masa mendatang, program CSR Perseroan akan difokuskan pada kemandirian masyarakat, peningkatan kapasitas diri, dan perekonomian masyarakat. Perseroan akan bekerjasama dengan masyarakat setempat dan seluruh pemangku kepentingan untuk mewujudkan hal ini.

Nevertheless, the Company continues to commit itself to providing added value to its local communities and improving their living standards.

So far, the Company's CSR activities have been implemented through Subsidiaries. The activities includes education, public facilities and infrastructure, health, religious activity, as well as social and cultural programs.

Along with the commencement of operational activities in the SGA refinery plant as well as the prospect of mining business in the future, the Company is looking forward to continue the CSR programs which pointed towards advancing people's lives. In the future, the Company's CSR program will focus on community self-reliance, self-capacity growth, and community economy development. The Company will work with local communities and all stakeholders to accomplish these programs.
