Pelibatan Pemangku Kepentingan

[102-42]

Pada tahun 2015, Perusahaan telah melakukan identifikasi pemangku kepentingan. Hasil pemetaan pemangku kepentingan ini tetap kami gunakan hingga 2017 sebagai dasar pelibatan pemangku kepentingan. Keberadaan pemangku kepentingan diidentifikasi menggunakan standar AA1000 SES tahun 2015, yaitu melalui focus group discussion (FGD) dan in-depth interview.

Stakeholder Engagement [102-42]

In 2015, the Company has identified stakeholders. Results of this stakeholder mapping are still in use until 2017 as a basis to engage stakeholders. The stakeholders were identified using the AA1000 SES of 2015 standard, through focus group discussion (FGD) and in-depth interviews.

OPTIMALISASI PERTAMBANGAN DAN LOGISTIK

MINE AND LOGISTICS OPTIMIZATION

Kami menyadari bahwa ITM telah tumbuh menjadi salah satu perusahaan pertambangan batubara terbesar dalam hal produksi di Indonesia. Pencapaian produksi ITM pada tahun 2017 lebih dari 22,1 juta ton dengan jaringan distribusi di Indonesia dan ke 13 negara tujuan ekspor.

We are aware that ITM has grown into one of the largest coal mining companies in terms of production in Indonesia. The production of 2017 reach over 22.1 million tons with distribution network in Indonesia and 13 other countries.

 23,1 JUTA TON MILLION TONS

Operasi Tambang yang Unggul

MINES OPERATIONS FOR EXCELLENCE

Perusahaan membangun keunggulan dan landasan operasional yang kokoh. Langkah ini telah ITM persiapkan sejak 2013 melalui transformasi bisnis secara bertahap dengan menekankan pada rantai nilai bisnis energi. Meskipun 4 dari 12 anak perusahaan belum beroperasi, ITM optimis akan merealisasikan pertambangan terpadu di tahun 2020.

The Company is building excellence and a solid operational foundation. This move has been prepared by ITM since 2013 through gradual business transformation by emphasizing on value chain of energy business. Although four out of 12 subsidiaries are not yet in operation, ITM is optimistic to realize the integrated mining by 2020.

Keunggulan ITM | ITM Advantages

SALAH SATU PRODUSEN BATUBARA TERBESAR DI INDONESIA ONE OF THE BIGGEST COAL PRODUCER IN INDONESIA

ITM terus bertumbuh secara organik dan inorganik. Melalui akuisisi PT Tepian Indah Sukses, luas WIUP kelolaan ITM menjadi 76.378 ha dan mengoptimalkan Perusahaan untuk terus berupaya mengembangkan sumber daya dan cadangan batubara.

ITM is continuously growing through organically and inorganically. With the acquisition of PT Tepian Indah Sukses in 2017, the managed WIUP areas become 76,378 ha and optimize ITM to improve its coal resource and reserve.

DIVERSIFIKASI MARKET TUJUAN DIVERSIFIED MARKET DESTINATION

Spesifiikasi batubara ITM bervariasi berdasarkan sumber tambangnya. ITM memiliki tujuh WIUP yang berdekatan dan beroperasi dalam sebuah jaringan distribusi yang luas. Dengan peluang tersebut, ITM berhasil mengembangkan jenis spesifikasi batubara tersendiri dan untuk memenuhi kebutuhan spesifikasi yang semakin ketat dan memperluas negara tujuan pasar ekspor.

ITM Coal specification varies based on the source of the mine. ITM has seven adjacent WIUPs and operates in an extensive distribution network. With these opportunities, ITM has successfully developed its own types of coal and derivatives to meet increasingly stringent specifications and expand the export market's destination countries.

MANAJEMEN RANTAI PASOKAN ENERGI ENERGY SUPPLY CHAIN MANAGEMENT

ITM memiliki 6 anak perusahaan yang bergerak langsung di sektor pertambangan, dan 6 anak perusahaan lainnya yang bertujuan untuk menunjang pertambangan. Diversifikasi usaha ini secara langsung menurunkan biaya logistik dan memaksimal nilai pemasaran energi, serta sekaligus meningkatkan kemampuan ITM dalam mengendalikan risiko harga komoditas.

ITM has six subsidiaries directly engaged in the mining sector, and six others to support the mining operations. The diversification of these businesses directly lowers logistics costs and maximizes the energy marketing value, as well as improves ITM's ability to control commodity price risks.

POSISI GEOGRAFIS YANG STRATEGIS STRATEGIC GEOGRAPHIC POSITION

Tujuh WIUP beserta seluruh bisnis penunjang tersentral di Kalimantan yang memiliki posisi strategis untuk memenuhi kebutuhan pasar di Southeast Asia. Keuntungan geografis beroperasi dan jalur distribusi yang menjadi titik temu perdagangan batubara, menjadikan ITM mampu menawarkan layanan yang efisien dan efektif.

Seven WIUP along with all the support businesses centralized in Kalimantan that have a strategic position to meet market demand in Southeast Asia. The geographical advantages in operations and distribution channels in the hub of coal trading, enables ITM to offer efficient and effective services.

MATURE ORGANIZATION

Organisasi ITM mengedepankan GCG dan meraih berbagai penghargaan nasional dan internasional. Sejak menjalankan program KOMPAK (Kelompok Peningkatan Aktivitas Kerja), ITM telah menjadi benchmark inovasi program di industri tambang bagi perusahaan tambang lainnya.

ITM organization promotes GCG and has won national and international awards. Since running the KOMPAK (Work Enhancement Activity Group) program, ITM has become a benchmark of program innovation in the mining industry for other mining companies.

Penghargaan 2017

Upaya ITM dalam menciptakan kinerja ekonomi yang kokoh tidak hanya terbatas dalam kinerja finansial. Hal ini tercermin dalam perolehan apresiasi di berbagai bidang.

2017 Awards

ITM's efforts to create robust economic performance are not only limited in financial performance. This is reflected in the appreciation received in various fields.

PT INDO TAMBANGRAYA MEGAH TBK **2017** Sustainability Report

Optimalisasi Biaya Logistik

Dengan diakuisisinya PT Gasemas (PTGE) pada tahun 2017, perusahaan distributor bahan bakar, ITM berhasil mengamankan pasokan energi yang lebih optimal. Selain mampu menghemat biaya bahan bakar, diversifikasi usaha melalui PTGE juga memberikan margin pendapatan baru diluar bisnis batubara.

Penghematan biaya logistik yang signifikan dalam rantai pasokan juga ITM capai dengan mengoptimalkan usaha jasa kontraktor oleh anak perusahaan (TRUST), program step change, dan pengembangan Teknologi Informasi (TI).

Logistics Cost Optimization

With the acquisition of PT Gasemas (PTGE) in 2017, a fuel distributor, ITM managed to secure a more optimal energy supply. In addition to being able to reduce fuel costs, business diversification through PTGE also provides new margin of income from non-coal business.

ITM's significant reduction of logistics cost in the supply chain was achieved by optimizing the contractor business service of subsidiary (TRUST), step change program, and development of Information Technology (IT).

Beberapa Upaya Efisiensi Signifikan | Significant Efficiency Efforts

PROGRAM STEP CHANGE STEP CHANGE PROGRAM

Program Step Change dikembangkan untuk meningkatkan inti bisnis yang kompetitif dengan mengurangi biaya dan menyelaraskan operasi. Di tahun 2017, ITM berhasil mengurangi jarak tempuh transportasi overburden, mengoptimalkan waktu dan besar pengangkutan tug & barge, serta beberapa efisiensi lainnya. Jumlah penghematan yang dicapai sebesar 25,8 juta USD, lebih besar dari yang ditargetkan 8,3 juta USD.

The Step Change program was set up in order to increase competitiveness of the core business by reducing costs and streamlining operations. In 2017, ITM was able to reduced overburden transportation distance, optimized the time and size of tug & barge, as well as accomplished other efficiencies. The saving value is amounted to 25.8 million USD, higher than the saving plan of 8.3 million USD.

PENERAPAN SISTEM IN-PIT CRUSHING & CONVEYING IMPLEMENTATION OF IN-PIT CRUSHING & CONVEYING SYSTEM

Sistem In-Pit Crushing & Conveying (IPCC) adalah suatu proses penambangan yang menggabungkan pekerjaan semi-mobile crusher, conveyor, dan spreader untuk pengelolaan dan pengangkutan tanah penutup yang lebih efisien. Penerapan IPCC dapat menghemat biaya pengangkutan lapisan tanah penutup menggunakan konveyor sehingga rasio pengupasan dapat ditingkatkan dan secara tidak langsung meningkatkan jumlah cadangan yang dapat ditambang. Selain itu, prosesnya lebih ramah lingkungan dan aman dengan PLTU berbahan bakar batubara dan mengurangi kebutuhan aktivitas transportasi.

The In-Pit Crushing & Conveying (IPCC) system is a mining process that combines semi-mobile crusher, conveyor, and spreader for efficient works in management and transportation of ground cover. IPCC implementation can reduce the cost of transporting overburden to increase stripping ratio and indirectly increase the amount of reserves that can be mined. In addition, the process is more environmentally friendly and safe facilitated with Coal-Fired Power Plant, and reduce the necessity of transportation activities.

MINE GEOGRAPHIC INFORMATION SYSTEM MINE GEOGRAPHIC INFORMATION SYSTEM

Mine Geographic Information System dikembangkan di tahun 2017 untuk memudahkan karyawan memetakan luas, kordinat, dan lokasi lahan vegetasi, bukaan lahan, dan kegiatan tambang lainnya.

The Mine Geographic Information System was developed in 2017 to facilitate employees in mapping the area, coordinates, and location of vegetation land, land clearing, and other mining activities.

Meningkatnya harga komoditas batubara ke tingkat tertinggi sepanjang empat tahun terakhir, menjadikan kinerja industri batubara mengalami penguatan yang signifikan. Meski demikian, fluktuasi harga batubara yang tajam menyebabkan harga dalam jangka panjang tidak menentu. ITM menyikapinya dengan tetap fokus pada produktivitas dan rasionalisasi biaya untuk menjaga nilai perusahaan yang berkelanjutan.

Pengelolaan biaya yang lebih efisien, memungkinkan Perusahaan untuk mendistribusi nilai ekonomi yang terjaga untuk mempertahankan marjin usaha yang positif. Rising coal commodity prices to the highest level during the last four years, significantly strengthened the performance of the coal industry. However, sharp fluctuations in coal prices caused uncertainty of long term prices. ITM addressed this by focusing on productivity and cost rationalization to maintain a sustainable company value.

More efficient cost management, enabling the Company to distribute a stable economic value to maintain a positive business margin.

Mitra Lokal Dalam Rantai Pasokan [102-10]

Dengan visi: Perusahaan membangun masyarakat lokal secara berkelanjutan, ITM menjalin kerjasama dengan perusahaan sebagai pemasok barang maupun jasa, dengan prioritas kontraktor lokal di sekitar area tambang. Penerapan strategis ini mengacu Peraturan Kementarian ESDM No.28 Tahun 2009 yang mendukung alih pengetahuan, pengembangan tenaga kerja lokal, dan penyerapan pendapatan asli daerah.

ITM bersama perusahaan mitra kerja yang terdaftar telah memberdayakan pekerja lokal asal daerah Kalimantan berdasarkan *point of hire*. Pada tahun 2017, pekerja asal daerah yang diberdayakan ITM mencapai 2.130 karyawan dan 12% diantaranya berhasil menempati posisi operational leader ke atas.

Dari jumlah vendor dan kontraktor terdaftar, 97,3% diantaranya berasal dari Indonesia dengan nilai kontrak pekerjaan mencapai 99,0% dari keseluruhan nilai pengadaan barang dan jasa.

Local Partner In Supply Chain

[102-10]

With a vision: The Company develops local communities sustainably, ITM cooperates with companies as supplier of goods and services, with priority for local contractors around the mining area. This strategic implementation refers to the Ministry of Energy and Mineral Resources Regulation No.28 of 2009 that supports the transfer of knowledge, development of local workforce, and the absorption of regional income.

ITM and its registered partners have empowered local workers from Kalimantan based on point of hire. In 2017, workers from regions empowered by ITM reached 2,130 employees and 12% of them managed to occupy the position of operational leader and above.

Of the total number of registered vendors and contractors, $97.3\,\%$ of them are from Indonesia with contract value reaching $99.0\,\%$ of the total value of goods and services procurement.

Jumlah Pemasok dan Nilai Pengadaan Barang dan Jasa (dalam USD) | Number of Suppliers and Value of Procurement of Goods and Services (in USD)

| KATEGORI CATEGORY | KONTRAKTOR | NILAI PENGADAAN BARANG DAN JASA VALUE OF PROCUREMENT OF GOODS AND SERVICES | PERSENTASE NILAI PENGADAAN PERCENTAGE OF PROCUREMENT VALUE |
|--------------------------------|------------|-------------------------------------------------------------------------------------|------------------------------------------------------------|
| NASIONAL NATIONAL | 1,281 | 147,921,974 | 99% |
| INTERNASIONAL INTERNATIONAL | 53 | 1,406,595 | 1% |
| JUMLAH TOTAL | 1,316 | 149,328,569 | 100% |

Keberlanjutan dalam *Contractor Management System* (CMS)

Selain memberikan keutamaan bagi mitra kerja lokal, ITM juga melakukan pengembangan dan pengukuran kinerja kontraktor yang konsisten dan menyeluruh melalui Contractor Management System (CMS). Departemen Operation setiap kwartal dan setiap tahun mengelola dan mengevaluasi kinerja CMS.

Sustainability in Contractor Management System (CMS)

In addition to giving priority to local partners, ITM also undertakes the development and measurement of contractor's consistent and comprehensive performance through Contractor Management System (CMS). The Operations Department every quarter and annually manages and evaluates the performance of the CMS.

Manfaat CMS bagi Mitra Kerja | CMS Benefits for Partners

TOLAK UKUR CMS LINGKUNGAN, KESELAMATAN DAN KESEHATAN KERJA

BENCHMARK OF CMS ENVIRONMENT, OCCUPATIONAL HEALTH AND SAFETY (EHS)

CMS EHS memampukan ITM untuk menciptakan pencatatan keselamatan dan kualitas kerja yang berstandar dan menyeluruh. Tolak ukur meliputi kebijakan, perencanaan, pelaksanaan, pemantauan, hingga tinjauan manajemen. Dengan demikian sistem ini mendorong perbaikan kinerja K3 dan lingkungan yang berkelanjutan dan pengembangan inovasi program lingkungan.

CMS enables ITM to create standardized and comprehensive safety recording and work quality. Benchmarks include policy, planning, implementation, monitoring, to management reviews. Thus, this system encourages the improvement of sustainable OHS and environment performance, as well as the development of environmental program innovation.

SINERGI CD MELALUI FORUM COMMUNITY DEVELOPMENT CD SYNERGY THROUGH COMMUNITY DEVELOPMENT FORUM

Forum Pengembangan Masyarakat mensinergikan program pengembangan masyarakat yang dilakukan bersama antara anak usaha ITM dan seluruh kontraktornya. Dengan demikian lingkup cakupan pengembangan masyarakat di sekitar wilayah operasi menjadi lebih luas dengan penyerapan dana yang efektif.

The Community Development Forum synergizes the community empowerment program undertaken by ITM subsidiaries and all its contractors. Thus the coverage of community development around the operation area becomes wider with effective fund absorption.

PROGRAM POOLING BAHAN BAKAR FUEL POOLING PROGRAM

Pooling bahan bakar mengamankan pasokan bahan bakar bagi ITM dan seluruh kontraktor di operasional site. Disertai perolehan diskon pembelian bahan bakar dan efsiensi logistik, program ini tidak hanya dapat menurunkan biaya bahan bakar tetapi sekaligus mengendalikan risiko kehilangan persediaan bahan bakar.

Pooling fuel secures fuel supply for ITM and all contractors at operational sites. With discounted prices on fuel purchases and logistics efficiency, the program not only reduces fuel costs but also controls the risk of losing inventory of fuel.

PERTEMUAN EKSEKUTIF KONTRAKTOR PENAMBANGAN TAHUNAN

ANNUAL MINING CONTRACTOR EXECUTIVE MEETING

Setiap tahun, ITM bersama pimpinan tertinggi dari masing-masing kontraktor memperkuat kemitraan dengan menyelaraskan target tahun mendatang, berbagi pengetahuan, dan memberikan penghargaan berdasarkan hasil audit CMS EHS.

Each year, ITM together with the top leaders of each contractor strengthen the partnership by aligning the next year's target, sharing knowledge, and presenting awards based on CMS EHS audit results.

Dalam rangka memastikan bahwa seluruh (100 %) kontraktor yang bekerja sama dengan Perusahaan tidak menghasilkan dampak negatif terhadap praktik ketenagakerjaan dan Hak Asasi Manusia (HAM), ITM menyertakan klausul dan persyaratan tertentu, meliputi pemenuhan upah minimum, jam kerja, tempat kerja aman, dan pelatihan K3.

.....

In order to ensure that all $(100\,\%)$ contractors working with the Company do not have a negative impact on labor and human rights practices, ITM includes certain clauses and requirements, including the compliance with minimum wages, working hours, safe workplaces and OHS training.

Pelanggaran atas klausul dalam kontrak kerja akan ditindak lanjuti dengan keras, di antaranya pemutusan kontrak. Pada waktu yang sama, ITM juga memberikan evaluasi perbaikan dan penghargaan berdasarkan hasil audit dan penilaian CMS EHS tahunan.

Violations of clauses in the work contract will be strictly followed up, including termination of the contract. At the same time, ITM also provides an evaluation of improvements based on the results of annual CMS EHS audit internal as 'gold' level indicates the best result.

Penilaian CMS EHS kepada Kontraktor 2017 | Contractors CMS EHS Assessment in 2017

Strategi Pemasaran Dan Manajemen Mutu

Ketika harga batubara melemah, keberadaan perjanjian penjualan jangka panjang dengan volume dan harga yang tetap menjadi salah satu strategi sebagian besar perusahaan tambang dalam mengelola risiko perubahan harga dan menjamin kestabilan pasokan. Namun demikian, kebijakan relaksasi ini juga yang mempengaruhi melemahnya harga batubara ketika harga pasar *on spot* mengalami kenaikan.

ITM melakukan beberapa strategi dengan menjalankan Kerangka Kerja Manajemen Mutu untuk menjaga posisi pasar. Penerapan manajemen mutu yang komprehensif dimulai dari tahap penambangan, pengangkutan, penyimpanan dan pengolahan, hingga tahap pengapalan. Perusahaan konsisten memenuhi pengiriman batubara secara tepat waktu dan dengan demikian, ITM tidak mengalami delay, tidak ada produk yang ditarik kembali, maupun tidak menambah biaya demurrage.

Strategi Menjaga Posisi Pasar:

- Pemasaran batubara blending yang memiliki spesifikasi tersendiri dan turunannya untuk memperluas target pasar.
- Pemasaran batubara ditujukan langsung kepada user tanpa melalui perantara.
- 3. Pengelolaan diversifikasi penjualan dan perdagangan batubara dengan kontrak jangka panjang dan pasar *on spot*.
- 4. Penjaminan kualitas batubara dengan manajemen mutu dan asuransi selama perjalanan dan disertai layanan *quality assurance*.
- Program keanggotaan Platinum dan Gold yang memberikan manfaat layanan prioritas dan purna jual meliputi dukungan ahli khusus pembakaran batubara. Hingga akhir tahun pelaporan, terdapat 7 pelanggan Platinum dan 31 pelanggan Gold.

Marketing Strategy And Quality Management

When coal prices weaken, the long-term sales agreements with fixed volume and prices remain one of the strategies of most mining companies in managing the risk of price changes and ensuring supply stability. However, this relaxation policy also affects the weakening coal prices when the on spot market price increases.

ITM undertakes several strategies by conducting a Quality Management Framework to maintain market position. The implementation of comprehensive quality management starts from mining, transportation, storage and processing, up to shipment stage. The Company consistently meets the delivery of coal in a timely manner and thus, ITM does not experience any delays, no product is withdrawn, nor does it increase demurrage charges.

Strategy to Maintain Market Position:

- 1. Marketing blending coal that has its own specifications and derivatives to expand the target market.
- Coal marketing is conducted directly to the user without intermediary.
- 3. Managing diversified sales and trading of coal with longterm contracts and on-spot markets.
- 4. Coal quality assurance by quality management and insurance during the delivery as well as quality assurance services.
- 5. Platinum and Gold membership program that provides priority and after sales service benefits including support from specialist in coal combustion. By the end of the reporting year, there were seven Platinum customers and 31 Gold customers.

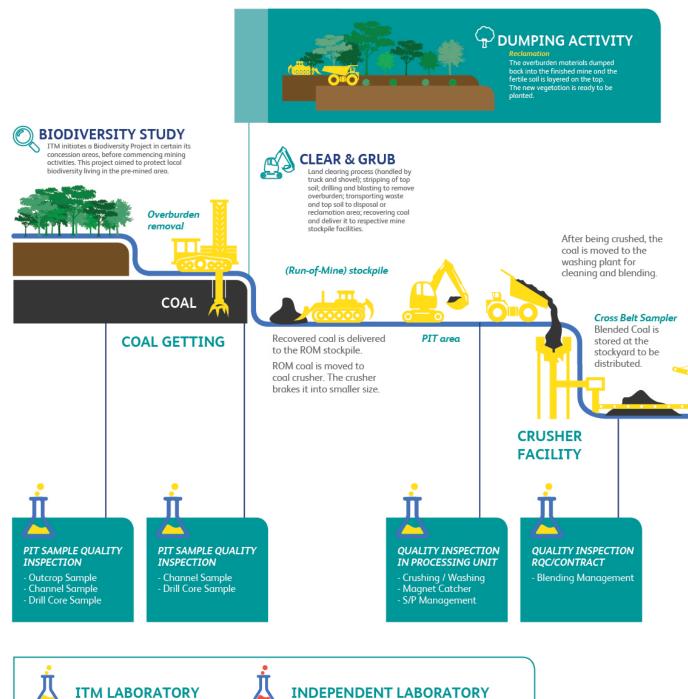

Manajemen Mutu di Beberapa Tahapan Operasi I Quality Management in Several Stages of Operation

Kerangka Kerja Manajemen Mutu

- 1. Menjaga konsistensi mutu produk sesuai kontrak
- 2. Fleksibel dalam jadwal kirim
- 3. Menyediakan layanan total termasuk penggunaan batubara dan emisi di pembangkit listrik pelanggan
- 4. Menerima saran peningkatan mutu dari pelanggan
- 5. Memperhatikan dan menanggapi dengan baik keluhan pelanggan sesuai dengan pedoman layanan

Quality Management Framework

- 1. Maintain product quality consistency according to contract
- 2. Flexible in delivery schedule
- 3. Provide total services including coal usage and emissions at customer power plants
- 4. Accept quality improvement suggestions from customers
- 5. Paying attention and respond to customer complaints in accordance with the service guidelines

Layanan yang prima kepada pelanggan di 14 negara juga dievaluasi secara berkala dengan melakukan survei kepuasan khusus kepada pelanggan utama. Beberapa faktor penilaian yang menjadi dasar survei, antara lain konsistensi kualitas batubara, realibilitas pengiriman kargo, kontaminsasi batubara, harga, fleksibilitas jadwal pengapalan, karakteristik pembakaran, dan penanganan batubara. Hasil dari evaluasi menjadi dasar bagi ITM untuk memperbaiki layanan yang lebih baik.

Service excellence to customers in 14 countries is also regularly evaluated by conducting a special customer satisfaction survey. Some of the assessment factors as basis of the survey are, among others, the consistency of coal quality, cargo delivery reliability, coal contamination, pricing, shipping schedule flexibility, combustion characteristics, and coal handling. The results of the evaluation becomes the basis for ITM to improve better services.

Twin Boom Stackle

The final coal is transported by hauling trucks, to the barge ports or Bontang Coal Terminal

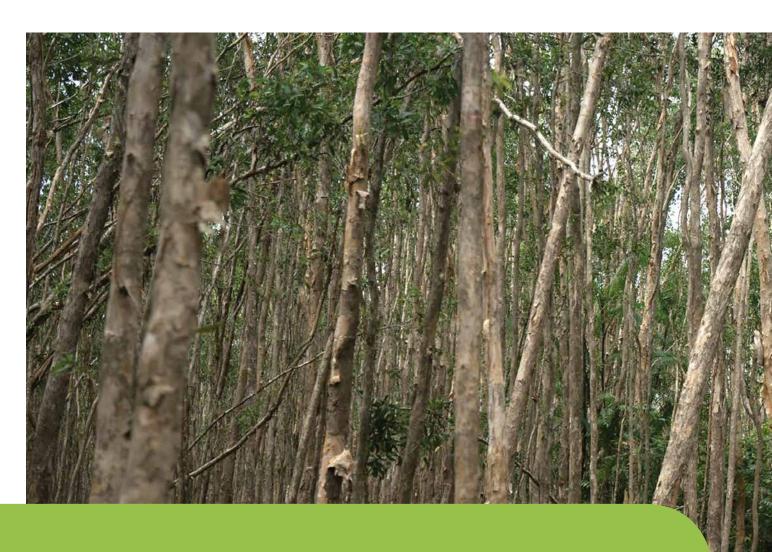

PENGELOLAAN LINGKUNGAN

ENVIRONMENTAL MANAGEMENT

Selama tahun 2017 ITM secara sungguh-sungguh melakukan pengelolaan dan pemantauan dengan menerapkan teknologi dan inovasi untuk meminimalkan dampak lingkungan. Buah dari kerja keras ini adalah pengakuan dari Kementerian LHK dalam bentuk pemberian penghargaan Proper Biru yang diterima JBG, TCM, dan Kitadin Site Embalut.

During 2017, ITM conducted management and monitoring by applying technology and innovation to minimize environmental impact. The hard work was recognized by the Ministry of the Environment in the form of a Blue Proper award received by JBG, TCM, and Kitadin Site Embalut.

Manajemen Pascatambang

POST-MINING MANAGEMENT MM101

Sejak 2016, kegiatan penambangan di KTD Tandung Mayang telah dihentikan. Untuk mengoptimalkan berbagai hal terkait pascatambang, ITM membentuk organisasi yang fokus kepada kegiatan tutup tambang dan dipimpin oleh Kepala Teknik Tambang pada tahun 2016. Organisasi inilah yang bertanggung jawab atas penerapan dokumen Rencana Pascatambang (RPT) yang telah disetujui pemerintah.

Since 2016, mining activities at KTD Tandung Mayang had been halted. To optimize matters related to post-mining, ITM established an organization focused on mine closure activities and led by the Mining Technical Head in 2016. This organization was in charge for the implementation of the Post-mining Plan (RPT) document that has been approved by the Government.

Beberapa Kebijakan dan Penerapan RPT Tandung Mayang [IMM10]
Policies and Implementation of Tandung Mayang RPT

PEMENUHAN ASPEK LEGALISTAS LEGAL ASPECT COMPLIANCE

Pemenuhan aspek legalitas kegiatan pascatambang berdasarkan surat Bupati Kutai Timur No.540/857.1/Distamben-PU/VIII/2014 dan sudah dilakukan komunikasi kepada pemangku kepentingan.

Compliance with legal aspects of post-mining activities based on letter of East Kutai Regent No.540/857.1/Distamben-PU/VIII/2014 and has been communicated to stakeholders.

PENGELOLAAN TENAGA KERJA MANPOWER MANAGEMENT

Pemenuhan kesejahteraan karyawan dilaksanakan terutama dengan kebijakan pelatihan kewirausahaan bagi seluruh karyawan. Selain itu, 417 karyawan mendapatkan kesempatan berkarir di perusahaan lain di bawah grup ITM.

The fulfillment of employee welfare is carried out primarily by the policy of entrepreneurship training for all employees. In addition, 417 employees had career opportunities at other companies under the ITM group.

REALISASI RENCANA REKLAMASI REALIZATION OF RECLAMATION PLAN

Pemenuhan tanggung jawab reklamasi bekas tambang dilakukan melibatkan kontraktor sejak 2016 sampai penyerahan lahan pasca tambang dengan rencana biaya reklamasi lebih dari 4,8 miliar rupiah. Pascatambang mencakup 229,4 ha area vegetasi atau 75% dari 305,4 ha area terganggu. Reklamasi lahan akan dikembalikan menjadi kawasan hutan sesuai dengan peruntukannya.

The fulfillment of ex-mining reclamation responsibilities have been involving contractors since 2016 to handover of post-mining land with a reclamation cost plan of more than IDR4.8 billion. Post-mining includes 229.4 ha of vegetation area or 75% of 305.4 ha of disturbed land area. Land reclamation will restore forest area according to its designation.

PENGEMBANGAN MASYARAKAT COMMUNITY DEVELOPMENT

Pengembangan masyarakat di 6 desa dampingan dilakukan sejak 2009. Dengan fokus utama dalam pengembangan peternakan, pertanian kelapa sawit, dan pelatihan *capacity building* untuk persiapan industri mandiri.

Community development in six assisted villages has been conducted since 2009. With the main focus in the development of farming, oil palm agriculture, and capacity building training for independent industry preparation.

Selanjutnya, pada tahun 2019, penambangan di JBG akan memasuki tahap pascatambang dan beberapa kebijakan serupa juga telah dipersiapkan. Bersamaan dengan pemenuhan komitmen ini, ITM menempatkan jaminan pascatambang sebesar 182,2 miliar rupiah.

Furthermore, by 2019, mining in JBG will enter the postmining stage and several similar policies have also been prepared. Along with the fulfillment of this commitment, ITM placed a post-mining guarantee of IDR182.2 billion.

Reklamasi dan Keanekaragaman Hayati

Bersamaan dengan kegiatan reklamasi lahan bekas tambang, ITM juga melakukan pengelolaan lahan reklamasi di WIUP lainnya sesuai izin pemanfaatan utama yang ditentukan. Sejak beroperasi, ITM telah melakukan studi Amdal dan menyusun Rencana Pengelolaan Lingkungan (RKL & RPL) sebagai dasar menentukan upaya pengelolaan lahan yang terganggu.

Reclamation and Biodiversity

Along with the mined land reclamation activities, ITM also conducts reclamation land management in other WIUPs according to the designated primary utilization permit. Since its operation, ITM has made Amdal study and developed an Environmental Management Plan and Environmental Monitoring Plan (RKL & RPL) as the basis to determine efforts of disturbed land management.

Beberapa Upaya Pengelolaan Lahan Terganggu I Disturbed Land Management Efforts

| AKTIFITAS TAMBANG MINE ACTIVITY | DAMPAK LINGKUNGAN ENVIRONMENTAL IMPACTS | MITIGASI MITIGATION |
|-----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PEMBUKAAN LAHAN LAND CLEARING | Peningkatan laju erosi, peningkatan sedimentasi dan penurunan tingkat kesuburan tanah Increased erosion rate, increased sedimentation and decreased soil fertility | Menimbun tanah pucuk pada tempat yang aman dari erosi maupun kegiatan penambangan Pile top soil in a safe place from erosion or mining activities Menanam rerumputan (cover crop) jenis CP, CM, dan Muccuna untuk mengendalikan hanyutnya tanah pucuk terangkut air larian dan menjaga kesuburan tanah. Plant cover crop of CP, CM, and Muccun to control the drift of top soil by runoff and maintain soil fertility Menerapkan sempadan sungai selebar 50 meter kanan-kiri sungai yang merupakan Sub-Sub DAS, sebagai kawasan konservasi. Implement a 50-meter-wide river border that is a Sub-Sub DAS, as a conservation area. Menerapkan metode penambangan gali timbun ke belakang (back filling) atau in pit dump Apply mining method of back filling or in pit dump |
| PENGGALIAN BATUAN PENUTUP EXCAVATION OF OVERBURDEN | Perubahan bentang alam, peningkatan laju erosi dan peningkatan sedimentasi Changes in landscape, increased erosion rates and increased sedimentation | 1. Melakukan reklamasi dan revegetasi lahan sesuai rencana reklamasi Reclamation and revegetation of land in accordance with the reclamation plan 2. Memelihara pertumbuhan tanaman revegetasi Maintain the growth of revegetation plants |
| PENGGALIAN, PEMUATAN DAN PENGANGKUTAN BATUBARA EXCAVATION, LOADING AND TRANSPORTATION OF COAL | Penurunan kualitas udara, peningkatan kebisingan dan perubahan bentang alam The decline in air quality, increased noise and landscape change | Melakukan perawatan mesin-mesin secara rutin pada alat-alat berat yang digunakan, agar diperoleh pembakaran sempurna Conduct maintenance of engines on heavy equipment used regularly for complete combustion Melakukan penyiraman jalan pada tapak tambang, jalan angkut, lokasi pengoperasian fasilitas, sarana dan prasarana tambang. Conduct road watering on mined land, haul road, facility operating location, mine facilities and infrastructure. Menerapkan kecepatan rendah khususnya untuk kendaraan angkut batubara (maksimum 40 km/jam) Use low speed especially for coal haul vehicles (maximum 40 km/h) Melakukan reklamasi dan revegetasi lahan sesuai dengan rencana Conduct reclamation and revegetation of land according to the plan |

Secara kumulatif, ITM telah menanam 5,8 juta pohon. Pelestarian lahan reklamasi dan kawasan hutan alam sekitar dilakukan bersama perusahaan mitra kerja dan dipantau secara berkala oleh Instansi Pemerintah.

Cumulatively, ITM has planted 5.8 million trees. The preservation of reclaimed land and natural forest area was conducted with the partner company and monitored regularly by the Government Agency.

Realisasi Kegiatan Reklamasi dan Revegetasi di Lokasi Tambang Realization of Reclamation and Revegetation at Mine Sites

| PARAMETER PARAMETER | AKUMULASI ACCUMULATION | 2017 | 2016 | 2015 |
|------------------------------------------------|---------------------------|---------|---------|---------|
| LAHAN TERGANGGU DISTURBED AREA ha | 23,056 | 891 | 949 | 1,551 |
| LAHAN REKLAMASI RECLAMATION LAND ha | 11,320 | 562 | 955 | 1,044 |
| LAHAN REVEGETASI REVEGETATED AREA ha | 11,233 | 494 | 800 | 680 |
| JUMLAH POHON NUMBER OF TREES Batang I Trees | 5,864,990 | 682,154 | 943,936 | 864,601 |

Dari seluruh luasan area wilayah izin usaha pertambangan ITM yang sudah beroperasi, Perusahaan telah menjalankan rencana konservasi keanekaragaman hayati di anak perusahaan BEK dan IMM. Kami bekerjasama dengan Unit Pelayanan Teknis (UPT) Kebun Raya Purwodadi di bawah kelola Lembaga Ilmu Pengetahuan Indonesia (LIPI).

Of the total of ITM mining business license area that has been operating, Company has put in place a conservation plan for biodiversity in subsidiaries of BEK and IMM. We cooperate with Technical Service Unit (UPT) of Purwodadi Botanical Garden under the management of Indonesian Institute of Sciences (LIPI).

Daftar Flora Dilindungi di Lahan Reklamasi | List of Protected Flora at Reclaimed Land

| NAMA ILMIAH SCIENTIFIC NAME | STATUS PERLINDUNGAN BERDASARKAN IUCN IUCN PROTECTION STATUS |
|--------------------------------|-------------------------------------------------------------------|
| Psydrax dicoccos | Vulnerable |
| Shorea smithiana | Critically endangered |
| Shorea lamelatta | Critically endangered |
| Shorea peltata | Critically endangered |
| Shorea agami | Endangered |
| Hopea pachycarpa | Vulnerable |
| Aglaia crassinervia | Near threatened |

ISMANTO SARAGIH

HSEC Department

Selama 2017, kami menanam 1,9 juta pohon, terdiri dari pohon tanaman lokal yang selama ini tumbuh di kawasan hutan. Hingga akhir tahun 2017, sudah ada pohon Meranti (Shorea Balangeran), Garu (Aquilaria malacensis), Ulin (Eusideroxylon swager), Nyatoh (Palaquium walsurifolium), Kapur (Dryobalanop lanciolata), dan tanaman lokal lainnya. "During 2017 we planted 1.9 million trees, consisted of local plants grown in forest areas. Until the end of 2017, there were trees such as Meranti trees (Shorea Balangeran), Gaharu (Aquilaria malacensis), Ulin (Eusideroxylon swager), Nyatoh (Palaquium walsurifolium), Kapur (Dryobalanop lanciolata), and other local plants".

Program Rehabilitasi DAS

Sesuai dengan ketentuan yang berlaku, Perusahaan melakukan kegiatan reklamasi di dalam areal Izin Pinjam Pakai Kawasan Hutan (IPPKH). ITM berkomitmen melaksanakan penanaman di daerah aliran sungai (DAS) pada berbagai lokasi, yang kemudian akan diserahkan kepada Direktorat Jenderal Pengendalian DAS dan Hutan Lindung, Kementerian LHK, dan selanjutnya diserahkan kepada pemangku kawasan untuk dikelola lebih lanjut.

Watershed Rehabilitation Program

In accordance with Government Regulation, the Company conducts reclamation within the area of Borrow and Use of Forest Areas Permit (IPPKH). ITM is committed to implement the rehabilitation of watersheds (DAS) in various locations, which is then submitted to the Directorate General of Watershed Control and Forest Reserve of the Ministry of Environment and Forestry. Hereinafter to be submitted once again to a district stakeholder for further development.

Kepatuhan Hukum atas Penanaman di Kawasan DAS
Compliance to Regulation regarding Planting in Watershed Area

Government Regulation No.24 of 2010 in conjunction with Government Regulation No.105 of 2015 on The Usage Of Forest Area

Permen LHK No.P.50/Menlhk/Setjen/Kum.1/6/2016 Tentang Pedoman Pinjam Pakai Kawasan Hutan Minister of Environment Regulation NoP.50/Menlhk/Setjen/Kum.1/6/2016 on Guidelines for Borrow and Use of Forest Area

Permen LHK No.P.89/Menlhk/setjen/kum.1/11/2016 Tentang Pedoman Penanaman Bagi Pemegang Izin Pinjam Pakai Kawasan Hutan Dalam Rangka Rehabilitasi Daerah Aliran Sungai

Minister of Environment Regulation NoP.89/Menlhk/Setjen/Kum.1/11/2016 on Guidelines for Planting By Permit Holder Of Forest Area In Order To Rehabilitate Watershed Area.

Khususnya di tahun 2017, ITM melalui PT Indominco Mandiri (IMM) telah melakukan penanaman DAS di kawasan hutan provinsi Kalimantan Timur dengan luasan area yang diserahkan kepada Kepala Balai Taman Nasional Kutai mencapai 600 hektar. Diluar dari luasan DAS yang telah diserahkan, IMM telah melakukan penanaman pohon di 9,000 ha sepanjang DAS yang akan diserahkan di waktu mendatang.

Especially in 2017, ITM through its subsidiary, IMM has conducted watershed planting activities in forest area East Kalimantan with area of 600 ha submitted to head of Kutai National Park. Beside the submitted area, IMM has been planting trees in 9,000 ha along the watershed, to be submit in the future.

Pengendalian Dampak Curah Hujan

Sejak 2016, tambang anak usaha ITM menghadapi tantangan curah hujan yang tinggi dan memperlambat realisasi target produksi. Tantangan ini kembali menjadi perhatian pada tahun 2017. Curah hujan yang lebat dan berkepanjangan telah mempengaruhi tertundanya jam operasional dan berkurangnya batubara yang ditimbun.

Curah hujan yang tidak mendukung menyebabkan tidak terpenuhi target produksi, yaitu 14% lebih rendah dibanding tahun sebelumnya. Oleh karena itu, dalam mengelola dampak perubahan iklim ini dan memastikan jam operasional yang optimal, ITM telah menambah jumlah kolam endapan dan menjalankan beberapa strategi.

Rainfall Impact Control

Since 2016, ITM subsidiaries' mines faced high rainfall and slow the realization of production targets. This challenge was again a concern in 2017. High and prolonged rainfall has caused delays in operational hours and reduced coal deposits.

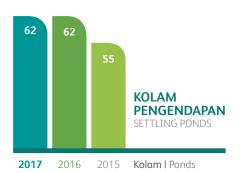

Unfavorable rainfall caused unmet production targets, which was 14% lower than the previous year. Therefore, in managing the impacts of climate change and ensuring optimal operating hours, ITM has increased the number of settling ponds and performed several strategies.

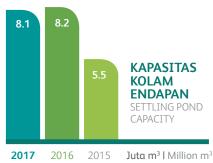

Upaya Pengelolaan Curah Hujan Tinggi dan Berkepanjangan | High and Prolonged Rainfall Management Efforts

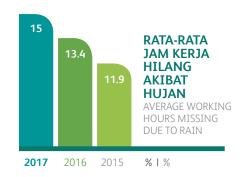

- Mengoperasikan 62 kolam pengendapan dengan kapasitas 8,1 juta m3 sebagai outlet untuk mengontrol erosi, menampung air, sedimentasi, dan mengolah aliran air untuk pemanfaatan kembali maupun pembuangan.
- Mengelola limpasan air hujan disekitar tempat penimbunan batubara dengan cara mengalihkan ke saluran-saluran drainase dan mengendapkannya di kolam sedimentasi
- Secara berkala mengeruk kolam sedimentasi dan menempatkan hasil kerukan dilokasi penimbunan batuhara
- 4. Melakukan kerjasama dengan BMKG untuk memantau tingkat curah hujan setiap kuartal

- 1. Operate 62 settling ponds with a capacity of 8.1 million m3 as outlets to control erosion, retain water, sedimentation, and process water flow for reuse and discharge.
- 2. Managing rainwater runoff around the coal stockyards by diverting to the drainage channels and depositing them in sedimentation ponds
- 3. Periodically dredge sedimentation ponds and place dredged results in coal stockpiling
- 4. Cooperate with BMKG to monitor the level of rainfall every quarter

Kinerja Pengelolaan Curah Hujan | Rainfall Management Performance

Pengelolaan Air [303-1]

Dengan melimpahnya ketersediaan air hujan, ITM berhasil memanfaatkannya sebagai sumber air olahan untuk penyiraman jalan, kendaraan dan fasilitas tambang, serta penyemprotan di *stockpile*. Pada tahun 2017, pemanfaatan kembali aliran air hujan (*run off*) hasil olahan kolam endapan mencapai 4,1 juta m³.

Sementara, kebutuhan air untuk pembangkit listrik PLTU diperoleh dari air permukaan laut dan kegiatan domestik diperoleh dari sumber air danau buatan dan air tanah. Hingga akhir tahun pelaporan, penggunaan air dalam beberapa aktivitas mengalami penurunan seiring dengan pascatambang di KTD Tandung Mayang, turunnya produksi akibat cuaca hujan yang panjang, dan kebijakan rasionalisasi biaya. Pada tahun 2017, intensitas air mencapai 0,22 m³/ton, lebih hemat 29 % dibanding tahun sebelumnya.

Water Management [303-1]

With the abundant of rainwater, ITM managed to utilize it as processed water source for watering road, vehicles and mining facilities, and spraying in stockpiles. In 2017, the reuse of runoff processed by settling ponds reached 4.1 million m³.

Meanwhile, water requirement for coal-fired power plants (PLTU) is sourced by seawater and domestic activity is sourced by man-made lake and ground water. Until the end of the reporting year, water consumption in some activities decreased with post-mining at KTD Tandung Mayang, decreased production due to long rainy weather, and cost rationalization policy. By 2017, the water intensity reached 0.22 m³/ton, 29 % more efficient than the previous year.

Penggunaan Air Berdasar Sumber (m³) | Use of Water by Source (m³) [303-1]

| URAIAN DESCRIPTION | 2017 | 2016 | 2015 |
|--------------------------------------------------------------------------------------------------------------|------------|------------|------------|
| PENGGUNAAN AIR KOLAM ENDAPAN UNTUK KEBUTUHAN OPERASI USE OF SETTLING POND WATER FOR OPERATIONAL NEEDS m³I m³ | 4,186,905 | 7,150,959 | 9,485,287 |

East Kalimantan Regional Regulation No.02 Year 2011 and Governor of South Kalimantan No.36

Manajemen Energi [302-1]

Kebutuhan energi utama dalam proses pertambangan dan distribusi yang digunakan Perusahaan adalah solar dan batubara. Sumber energi sebesar 7,4% terpenuhi melalui pembangkit listrik PLTU 2x7 MW di IMM yang dijalankan dengan batubara hasil produksi sendiri. Sementara sebagian besar lainnya terpenuhi oleh generator berbahan bakar solar. Adapun sisanya terpenuhi dari listrik PLN untuk kebutuhan operasi JBG, bensin dan solar untuk kegiatan penunjang lainnya.

Penggunaan dan penghematan energi dihitung secara internal melalui kegiatan audit energi dan mulai disertai verifikasi eksternal oleh pihak independen yang bersertifikasi, PT Mitra Solusi Energi Berkelanjutan pada tahun 2017. Intensitas energi 2017 mengalami peningkatan sebesar 27%. Hal ini dikarenakan perubahan metode perhitungan energi kini memperhitungkan nilai kalori batubara untuk kegiatan pembangkit listrik dan jumlah penggunaan solar untuk aktivitas barging.

Energy Management [302-1]

The main energy sources in the Company's mining and distribution processes are diesel and coal, and have not yet applying renewable energy. The electricity source of 7.4% was supplied by a 2x7 MW coal-fired power plant in IMM which is run by using the company's own production coal. While most of electricity was met by diesel generators. The remaining were supplied by electricity from state power company PLN for JBG operation, gasoline and diesel to support other supporting activity.

The energy usage and reduction are calculated internally through energy audit and followed by external verification by certified independent party, PT Mitra Solusi Energi Berkelanjutan starting from this 2017. Intensity of energy usage in 2017 increased by 27%. The increase of energy usage was resulted due to the change of energy calculation method, which starting to include the calorific value of coal for power plant and usage of diesel for barge activity.

Penggunaan Energi Berdasarkan Sumber | Energy Usage Based on Sources [302-1]

Manajemen Karbon

Sejak 2015, ITM telah tergabung dalam Carbon Disclosure Project melakukan pelaporan kinerja pengurangan, pengendalian, dan pengelolaan emisi GRK. Secara berkesinambungan, Perusahaan melakukan perhitungan beban emisi GRK dari berbagai sumber.

GHG Emissions Management

Since 2015, ITM has joined in Carbon Disclosure Project (CDP) to report on performance of emission reduction and its management. The Company regularly calculates GHG emission generated from various sources.

Keterangan I Note

Perhitungan emisi GRK dilakukan menggunakan nilai faktor emisi berdasarkan A Corporate Accounting and Reporting Standard (Revised Edition), Global Warming Potential (GWP) mengacu pada IPCC Fifth Assessment Report (ARS), dan Ketentuan dari lokasi kami berada. Perhitungan GRK meliputi gas CO₂, CH₄, N₂O, dan HFCs. The calculation of GHG emissions using emission factors based on A Corporate Accounting and Reporting Standard (Revised Edition), Global Warming Potential (GWP) referred to IPCC Fifth Assessment Report (ARS), and standards from specific-location where we operate. Gases included in GHG calculation are CO₂, CH₄, N₂O, and HFCs.

Seiring dengan upaya efisiensi energi, audit energi, dan penanaman pohon, penurunan emisi GRK terus digiatkan. Dengan baseline tahun 2012, ITM berhasil menurunkan emisi sebesar 27,8% di tahun 2017 dan melampaui target penurunan 2020 sebesar 25%. Meskipun demikian, intensitas emisi yang dihitung pada tahun 2017 mencapai 0,087 ton CO₂eq/Ton meningkat 14,9% dibandingkan tahun sebelumnya.

Peningkatan ini dikarenakan perubahan metode perhitungan emisi GRK berdasarkan pemakaian energi dari aktivitas operasi; pertambangan, penunjang, kegiatan peledakan dan *open pit*. Hal ini menyebabkan perhitungan emisi GRK di tahun 2017 mulai mencakup jumlah emisi yang ikut dihasilkan dari konsentrasi gas *Carbon Dioxide* (CO₂), *Methane* (CH₄), *Nitrous Oxide* (N₂O), dan *Hydrofluorocarbons* (HFCs) yaitu residu kegiatan peledakan dan *open pit*. Selain itu, perhitungan juga disempurnakan dengan menyertakan pemakaian bahan bakar diesel untuk aktivitas pengangkutan batubara dengan menggunakan *barge*.

Along with the efforts of energy efficiency, energy audit and tree planting, the efforts to reduce GHG emission have already been promoted. With baseline on 2012, ITM have achieved GHG emission reduction for 27.8% till 2017 and exceed our target of 25% by 2020. However the GHG emission intensity in 2017 reached 0.087 tons of $\rm CO_2 eq/Ton$, increase by 14.9% compared to the previous year.

[305-5]

This increase was due to the change of calculation method for GHG emission based on energy consumed in operationg activities; mining, supporting, blasting and open pit. This change caused the GHG emission calculation in 2017 began to include the amount of emission generated from the gases of Carbon Dioxide (CO $_2$), Methane (CH $_4$), Nitrous Oxide (N $_2$ O), and Hydrofluorocarbons (HFCs) which is the residue of blasting and open pit activity. Furthermore, the scope of calculation has also been improved to include the usage of fuel diesel for barging activities.

Beberapa Upaya Pengurangan Emisi GRK (Ton CO₂eq) | Efforts of GHG Emissions Reduction (Ton CO₂eq)

Pengelolaan Limbah

Secara umum seluruh limbah air dari kegiatan tambang diolah melalui kolam endapan. Sementara untuk limbah padat, pengelolaan dilakukan dengan memperhatikan prinsip 3R; reduce (mengurangi), reuse (memanfaatkan kembali), dan recycle (daur ulang).

Pencatatan jumlah, tata cara penyimpanan, dan pengolahan limbah dilakukan ITM berdasarkan SOP dan diawasi oleh Departemen HSE. Limbah yang dihasilkan dibagi dua, yaitu limbah berbahan berbahaya dan beracun (B3) dan padat non B3. Guna meminimalkan potensi pencemaran lingkungan, maka ITM melakukan pengelolaan limbah sesuai dengan jenis dan karakteristiknya.

Sesuai dengan kompetensi inti ITM untuk memproduksi dan mendistribusi energi, maka pengelolaan limbah B3 dikelola dengan diserahkan ke pihak ketiga yang memiliki izin. Meskipun demikian, ITM telah memperoleh izin SK Kementerian LH No.07.14.03 Tahun 2014 & SK KLH No.232 Tahun 2013 untuk mengelola *fly ash* dan *bottom ash* hasil limbah B3 dari PLTU sebagai bahan konstruksi *paving block* dan bahan industri semen, serta oli bekas untuk bahan campuran dalam kegiatan peledakan (ANFO). Sementara, pengelolaan limbah non B3 organik dimanfaatkan sebagai kompos dan sampah non-organik dikelola oleh pihak ketiga.

Waste Management

In general, all effluent from mining activities is processed through settling ponds. As for solid waste is managed by the 3Rs principle; reduce, reuse, and recycle.

Recording of amount, storage procedure, and waste treatment are conducted by ITM based on SOP and supervised by HSE Department. The generated waste is divided into two, ie hazardous and toxic (B3) and non-B3 solid waste. In order to minimize the potential environmental pollution, ITM undertakes waste management according to its type and characteristics.

In accordance with ITM's core competencies to produce and distribute energy, B3 waste management is managed by handed over to licensed third parties. However, ITM has obtained permit to manage fly ash and bottom ash generated from B3 waste of PLTU as construction material of paving block and used oil for material mixture in blasting activities (ANFO), based on Ministry of Environment's Decree No.07.14.03 of 2014 & Decree No.232 of 2013. Meanwhile, the management of organic non-B3 waste is reused as compost and non-organic waste is managed by third party.

Pada tahun 2017, ITM berhasil menurunkan intensitas limbah non B3 sebesar 24%. Pencapaian ini berhasil diraih melalui peningkatan pengelolaan 3R atas *fly ash*, *bottom ash*, dan oli bekas, serta sampah organik.

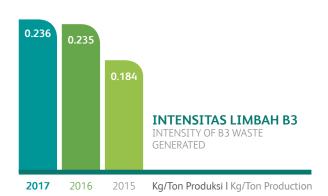

In 2017, ITM successfully reduced non-B3 waste intensity by $24\,\%$. This was achieved through improved 3Rs management of fly ash, bottom ash, and used oil, as well as organic waste.

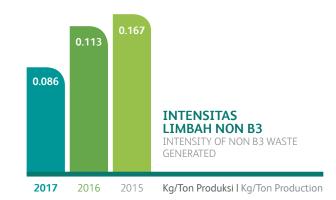

IVAN F. B. MANALU HSE System Development and Data Analysis Head

ITM diberi kepercayaan oleh Kementerian Lingkungan Hidup & Kehutanan dengan memiliki izin untuk mengelola beberapa jenis limbah B3. Kami memanfaatkan kembali fly ash dan bottom ash sebagai bahan konstruksi paving block, serta oli bekas sebagai campuran bahan peledak. Pada tahun 2017, jumlah pemanfaatan limbah B3 mencapai 35% dari seluruh limbah yang dihasilkan.

ITM is trusted by the Ministry of Environment & Forestry to own permit to manage certain types of B3 waste. We use fly ash and bottom ash as paving block, as well as used oil for blasting material mixture. By 2017, the total utilization of B3 waste reached 35% of all waste generated.

HR FRAMEWORK HR FRAMEWORK

HR Framework menerjemahkan visi dan misi perusahaan kedalam bentuk rancangan organisasi dan strategi penerapan budaya perusahaan. Untuk mencapai kedua hal tersebut diperlukan SDM yang memenuhi standar kompetensi tertentu. Semua proses kerja HR berbasiskan kompetensi dimulai dari proses seleksi dan penerimaan karyawan, pelatihan dan pengembangan sampai dengan pengembangan karir karyawan.

The HR Framework translates the Company's vision and mission into organizational design and strategy of corporate culture. It requires human resources that meet certain competency standards. All HR work processes are based on competence starting from the employee selection and hiring process, training and development, up to employee career development.

STRATEGIC PEOPLE DEVELOPMENT STRATEGIC PEOPLE DEVELOPMENT

Proses pengembangan SDM didasarkan pada persyaratan kompetensi yang terdiri dari *core, leadership* dan *functional* kompetensi. Dalam rangka membekali karyawan dalam pengembangan karirnya, perusahaan merancang ITM Virtual University terdiri dari 12 fakultas atau stream sesuai dengan bisnis proses ITM.

HR development process is based on competency requirements consisting of core, leadership and functional competencies. In order to equip employees in their career development, the Company has designed ITM Virtual University consisting of 12 faculties or streams according to ITM's business process.

Penerapan Budaya Banpu Spirit

Kebijakan atas penegakkan budaya kerja diawali dengan kepatuhan Kode Etik atau Aturan Perilaku yang menjadi pedoman bagi manajemen dan seluruh karyawan ITM. Selanjutnya penerapan budaya kerja menunjukkan integrasi sikap dan perilaku karyawan dalam memenuhi budaya kepatuhan dan standar global.

ITM telah memiliki nilai-nilai inti yang dinamakan Banpu Spirit yang harus menjadi karakter setiap individu ITM. Dengan nilai-nilai tersebut, Kami berkeyakinan ITM dapat mencapai visi Perusahaan dan mendukung pembangunan berkelanjutan.

Implementation of Banpu Spirit Culture

The policy on upholding work culture begins with the compliance of the Code of Ethics or Code of Conduct that guides the management and all ITM employees. The work culture implementation demonstrates the integration of employee attitudes and behaviors in meeting global compliance and standards.

ITM has develop core values, called 'Banpu Spirit', which has been rooted as character in every individual of ITM. Along with this core value, We believe that ITM can achieve our vision and support a sustainable development.

Nilai Budaya Banpu Spirit | Banpu Spirit Cultural Values [102-16]

Upaya Sosialisasi & Penerapan Budaya Banpu Spirit
Dissemination and Implementation of Banpu Spirit Culture

KAMPANYE NILAI BANPU SPIRIT CAMPAIGN OF BANPU SPIRIT VALUES

Sosialisasi Nilai Banpu Spirit dilakukan melalui berbagai media seperti *email, banner, signage*, spanduk, dan sosialisasi melalui berbagai kegiatan ketenagakerjaan.

Dissemination of Values Banpu Spirit is conducted through various media such as email, banners, signage, as well as various employee activities.

PELATIHAN BANPU SPIRIT BANPU SPIRITTRAINING

- Pelatihan kode etik dan nilai budaya merupakan keharusan bagi seluruh karyawan sebagai penerapan tata kelola yang baik.
 Training on code of ethics and cultural values is mandatory for all employees as the implementation of good governance.
- Pelatihan Banpu Spirit untuk mengaktifkan 5 power yang ada pada setiap diri individu karyawan dalam menerapkan nilai-nilai dasar yang akan menjadi landasan perilaku karyawan di perusahaan.

Banpu Spirit Training is to activate the 5 powers inside each employee to apply the core values that will be the basis of employee behavior in the company.

BANPU SPIRIT CHANGE LEADER BANPU SPIRIT CHANGE LEADER

Keterlibatan karyawan sebagai agen perubahan (change agent) yang dinamakan Banpu Spirit Change Leader dilaksanakan untuk mendorong budaya terinternalisasi dalam keseharian bekerja.

Employee involvement as a change agent called Banpu Spirit Change Leader is implemented to encourage the culture internalized in everyday work

SURVEI BANPU SPIRIT BANPU SPIRIT SURVEY

Pengukuran implementasi budaya perusahaan dilakukan setiap tahun dengan metode survei daring dan luring untuk pengukuran kuantitatif dan forum diskusi (FGD) untuk pengukuran kualitatif. Kegiatan FGD menjadi bahan evaluasi peningkatan internalisasi budaya perusahaan di tahun berikutnya. Berdasarkan hasil Survei Banpu Spirit 2017, pemahaman Banpu Spirit mencapai 81,5 %.

The measurement of corporate culture implementation is carried out annually by both online and offline surveys for quantitative measurement and discussion forums (FGDs) for qualitative measures. Focus Group Discussion (FGD) activity is an evaluation of the internalization enhancement of corporate culture in the following year. Based on Banpu Spirit Survey 2017, Banpu Spirit's understanding reached 81.5%.

Keberagaman Dalam Kesetaraan

Selain karyawan yang berkerja di Kantor Pusat DKI Jakarta, seluruh karyawan, baik di bisnis pertambangan dan bisnis penunjang yang tersebar di provinsi Kalimantan Timur, Kalimantan Tengah, dan Kalimantan Selatan memiliki hak dan kewajiban yang sama dalam berkarya, sesuai dengan jenjang pekerjaan.

Kebijakan kesempatan berkarir yang setara ini kami tuangkan dalam Peraturan Perusahaan (PP) dan Perjanjian Kerja Bersama (PKB) sesuai prinsip *Equal Employment Opportunities* (EEO). Kami tidak menjadikan isu gender, suku, agama, ras (SARA) maupun antar golongan bahkan afiliasi politis, sebagai pertimbangan dalam rekrutmen.

Hingga akhir tahun 2017, komposisi karyawan lebih banyak laki-laki sesuai dengan kondisi usaha di industri pertambangan yang membutuhkan banyak tenaga ahli di lapangan. Meskipun tidak ada perbedaan fasilitas kerja berdasarkan gender, merujuk UU No.13 tahun 2003 dan ketentuan PP dan PKB, Perusahaan memberikan beberapa kemudahan bagi karyawati dengan mempertimbangkan sifat kodrati mereka.

Diversity In Equality

In addition to employees working in DKI Jakarta Head Office, all employees, both in the mining and supporting businesses scattered in the provinces of East Kalimantan, Central Kalimantan, and South Kalimantan have the same rights and obligations, in accordance with the position level.

We include equal work opportunity in the company regulation (PP) and Collective Labor Agreement (CLA) which complies with the Equal Employment Opportunities (EEO) principle. We do not make gender, ethnic, religious, racial (SARA) or intergroup issues and even political affiliations, as consideration of recruitment.

Until the end of 2017, the employee composition has more male employees due to business conditions in the mining industry that requires a lot of experts in the field. While there are no gender-based workplace differences, referring to Law No.13 of 2003 and the PP and CLA provisions, the Company provides some convenience to female employees taking into account their nature.

| KTD - EMB, SAMARINDA | 144 | 145 | 154 |
| JBG – JORONG | 123 | 123 | 124 |

Keterangan I Note

Dari jumlah karyawan ITM, tidak ada karyawan yang masih dalam supervisi. [102-8]

No ITM employees are still under supervision or undergoing Geologist $\overset{.}{\&}$ Engineer Trainee (GET) program 2017.

Jumlah karyawan di lokasi penempatan dihitung berdasarkan Wilayah Izin Usaha Pertambangan (WIUP), memenuhi ketentuan dalam pencatatan kecelakaan kerja dan perhitungan lainnya.

The number of employees at the placement locations is calculated based on the Mining Business License Area (WIUP), fulfilling the requirements of the recording of occupational accidents and other calculations.

TIS belum beroperasi dan berproduksi.

TIS is not yet in operation and producing.

Ketentuan UU dan PKB menjamin salah satu syarat penerimaan karyawan baru, adalah usia minimal 18 tahun dan tidak ada yang berusia di bawah umur atau sebagai pekerja anak. Selain itu, perlindungan atas pekerja juga ditegakkan melalui pencantuman bahasan 'pemberlakuan hari kerja, waktu kerja, dan kerja lembur' di dalam PKB. Dengan demikian, maka ITM tidak pernah melakukan pemaksaan kerja kepada setiap karyawan.

The provisions of laws and CLA guarantee that one of the requirements for the new employee recruitment, is a minimum age of 18 years and no underage or child labor. In addition, the protection of workers is also enforced through the inclusion of 'work day, work time, and overtime' in the CLA. Thus, ITM never imposed work on every employee.

Pemenuhan Manfaat Kerja [401-2]

Sejalan dengan prinsip Perusahaan untuk memberikan kesempatan yang setara bagi setiap karyawan, maka kami tidak membedakan besaran imbalan jasa pekerjaan antara karyawan laki-laki dan perempuan. Upah minimum terendah yang diberikan Perusahaan telah memenuhi 102% UMP daerah. Perbedaan terjadi karena status kepegawaian, penilaian kinerja, posisi/jabatan dan lama bekerja sesuai dengan ketentuan dan perjanjian kerja bersama (PKB) yang berlaku.

Employee Benefit Fulfillment [401-2]

In line with the Company's principle to provide equal opportunity for each employee, we do not distinguish the amount of employee benefits between the male and female employees. The lowest of minimum wage provided by company has reach 102% of provincial minimum wage. Differences occur due to employment status, performance assessment, position/job and duration of work in accordance with applicable provisions and collective labor agreement (CLA).

Keterangan | Note

¹Manfaat karyawan diberikan kepada setiap karyawan. Dalam hal ini, tidak ada wilayah operasi yang dinilai lebih signifikan dibanding yang lain.
¹Employee benefits are given to each employee. In this case, no area of operation is considered more significant than others.

ITM memiliki sejumlah manfaat, fasilitas, dan program bagi karyawan yang didedikasikan untuk mendukung kondisi kerja yang prima dan hubungan kerja yang harmonis. Salah satunya adalah program *further study*, yaitu beasiswa bagi karyawan dengan pendidikan tingkat lanjut yang sesuai kebutuhan bisnis perusahaan. Pada tahun 2017, terdapat 3 karyawan yang menjalani *further study*.

ITM has a number of benefits, facilities, and programs for employees dedicated to supporting excellent working conditions and harmonious working relationships. One of them is the further study program, which is scholarship for employees with advanced education according to the Company's business needs.

²sesuai kontrak

Kesejahteraan Bagi Karyawan Purnabakti [401-2]

Berdasarkan *HR Policy*, Perusahaan memberikan perhatian bagi karyawan yang memasuki usia purnabakti, yaitu di usia 55 tahun. Selama tahun 2017, ITM menyelenggarakan pembekalan bagi 19 karyawan dalam bentuk imbalan kerja dan pelatihan kewirausahaan.

Welfare for Retirees [401-2]

Based on the HR Policy, the Company pays close attention to employees who are retiring at the age of 55 years. During 2017, ITM organized precondition for 19 employees in the form of employee benefits and entrepreneurship training.

Kerangka Program Purnabakti | Retirement Program Framework

MASA PERSIAPAN PENSIUN PRE-PENSION PERIOD

Tiga bulan menjelang usia pensiun, karyawan didaftarkan sebagai peserta program Masa Persiapan Pensiun (MPP). Karyawan terdaftar tidak diwajibkan bekerja dan dipersiapkan secara *mental* untuk menjalani bisnis dan mendapatkan beberapa Jaminan Sosial.

Three months prior to turning into retirement age, employees are enrolled as participants of the Pension Preparation Period (MPP) program. Registered employees are not required to work and be mentally prepared for business and receive some benefits from Social Security.

IMBALAN PENSIUN DAN IMBALAN KERJA JANGKA PANJANG PENSION BENEFITS AND SERVICE AWARD

Bentuk imbalan pascakerja iuran pasti sesuai amanat dari UU No.13 tahun 2003 adalah Jaminan Hari Tua dari BPJS dan sesuai peraturan PP dan PKB.

The defined contribution form of post-employment benefits in accordance with Law No.13 of 2003 is the Old Age Security from BPJS in accordance to PP and CLA.

PELATIHAN PERSIAPAN PURNABAKTI DAN PROGRAM KEWIRAUSAHAAN

RETIREMENT PREPARATION TRAINING AND ENTREPRENEURSHIP PROGRAM

ITM memberikan pembekalan atau prakondisi sebagai persiapan karyawan yang memasuki usia pensiun. Pembekalan ini dimulai dari persiapan mental, pengelolaan keuangan, kesehatan, sosialisasi hak pensiun, dan pelatihan wirausaha yang diikuti dengan kunjungan ke pelaku bisnis yang telah sukses. Kebijakan ini diharapkan mampu memicu semangat usaha mandiri setelah pensiun.

ITM provides preconditions as preparation for employees entering retirement age. This preconditions begins with mental preparation, financial management, health, dissemination of pension rights, and entrepreneurship training participated through visits to successful businesses. This policy is expected to trigger the spirit of entrepreunership after retirement.

Pengembangan Standar Kompetensi

Faktor penting yang mempengaruhi hasil evaluasi dan pengembangan karir karyawan adalah pemenuhan standar kompetensi. Secara berkesinambungan, ITM menyelenggarakan berbagai seminar, lokakarya, pelatihan dan sertifikasi yang disusun berdasarkan kebutuhan pemenuhan standar kompetensi dan kerangka kerja Strategic People Development. Realisasi investasi pengembangan SDM di tahun 2017 mencapai USD743.286.

Development of Competency Standards

An important factor that influences employee evaluation and career development outcomes is the fulfillment of competency standards. ITM continuously organizes seminars, workshops, trainings and certifications that are tailored to meet the requirements of competency standard fulfillment and the Strategic People Development framework. Realization of human resource development investment in 2017 reached USD743.286.

Sistem Manajemen K3

Upaya pelaksanaan program K3 yang terpadu di seluruh wilayah kerja, ITM wujudkan melalui penerapan Sistem Manajemen Keselamatan Pertambangan Mineral dan Batubara (SMKP Minerba) dan Sistem Manajemen K3 (SMK3). SMK3 di kelola oleh Departemen *Quality, Safety,* and *Environment*. Beberapa anak usaha ITM juga telah mendapatkan sertifikasi internasional OHSAS 18001:2007.

OHS Management System

ITM realizes the efforts to implement an integrated OHS program at the entire work areas by adopting Safety Management System for Mining Industry and OHS management system. The OHS management system is carried out by the Department of Quality, Safety, and Environment. Several ITM's subsidiaries also has obtained international certification of OHSAS 18001: 2007.

MISI MANAJEMEN K3 OHS MANAGEMENT MISSION

- Nihil kecelakaan yang berakibat hilangnya hari kerja
 Zero accident resulting lost time injury
- 2. Nihil terulangnya kecelakaan Zero recurrence accident
- 3. Nihil pelanggaran persyaratan dan pemenuhan standar K3 & KO Zero violation of OHS & safety operation standards & policy
- 4. Mencegah gangguan kesehatan dan nihil penyakit akibat kerja
 Prevent health issue and zero occupational disease
- 5. Memenuhi aspek keselamatan operasional pertambangan baik sarana, prasarana, instalasi dan peralatan *In compliance to safety standards for mining's facilities, infrastructure, installations, and equipmenets.*

TARGET MANAJEMEN K3 OHS MANAGEMENT TARGET

- Injury Frequency Rate (IFR): < 0.19
- Injury Severity Rate (ISR): <1.83
- Safety Health Environmental Accountability Program (SHEAP): $\geq 45\%$
- Hazards Report (AWAS): $\geq 17.5\%$ of total employees
- CMS EHS: ≥80 % Green Level
- SMKP Minerba:≥80 % Green Level

Mengembangkan SDM yang memiliki kompetensi, kepedulian, dan kepemimpinan K3 yang dilengkapi dengan sistem pelaporan AWAS (Amati, Waspadai, dan Segera Laporkan) dan Safety Health Environmental Accountability Program.

Develop human resources with competency, awareness, and leadership in OHS, equipped with Hazard/Near-Miss Report and Safety Health Environmental Accountability Program.

PILAR PERALATAN DAN PROSES

EQUIPMENT AND PROCESS PILLAR

Memastikan sarana, prasarana, instalasi, dan peralatan yang baik dan layak pakai untuk keamanan operasional.

Ensure facilities, infrastructure, installations, and equipment are in fit and proper conditions for operational safety.

Penerapan SMKP Minerba dan SMK3 dimulai dengan menimbulkan kesadaran dan pentingnya risiko kerja melalui kegiatan komunikasi K3, pembahasan K3 dalam PKB, dan pembentukan komite K3 di tingkat manajemen. PKB yang berlaku melindungi 100% atau seluruh karyawan dan menjadi acuan penyelesaian perselisihan hubungan industrial.

The implementation of Mining Safety Management System and OHS management system begins with raising the importance to recognize safety through OHS communication activities, OHS subjects in CLA, and establishment of OHS committee at managerial level. The prevailing CLA covers 100% of all employees and becomes a reference to the settlement of industrial relations disputes.

Pembahasan K3 diatur dalam PKB | OHS Subjects Stipulated in the CLA

Berdasarkan Peraturan Menteri Ketenagakerjaan (Permenaker) RI No. PER.04/MEN/1987 dan Permen ESDM No.38 tahun 2014 tentang Sistem Manajemen Keselamatan Pertambangan, setiap anak perusahaan ITM membentuk Komite K3 yang disebut Panitia Pembina Keselamatan & Kesehatan Kerja (P2K3) atau Komite Keselamatan Pertambangan yang diketuai oleh Kepala Teknik Tambang. Anggota P2K3 adalah karyawan dari tingkatan manajemen hingga pengawas dari setiap departemen.

In compliance to Manpower Department Regulation No. PER.04/MEN/1987 and MEMR Department Regulation no.38 year 2014, each ITM subsidiary has an OHS Committee called P2K3 or Mining Safety Committee chaired by Technical Mine Manager. OHS Committees consist of employees from management and supervisor level from every department.

Penerapan SMK3 telah memetakan dan mengidentifikasi jenis pekerjaan dalam kategori berisiko tinggi, yakni kerja di ketinggian, kerja dengan menggunakan alat berat, berkendaraan di jalan angkutan batubara, dan di ruang terbatas. Dengan demikian, bahaya pekerjaan berisiko tinggi dapat diminimalkan.

During 2017, OHS management system has mapped and audited types of job in high-risk categories including working at height, working with heavy equipment, unit interaction in hauling road, and confined space. Thus, the hazards of high-risk jobs can be minimized. [403-3]

Require a safe driving conditions, such as using seat belts, do not driving too close, do not parking and blocking other vehicles, and required to have SIMPER license. |
| ISOLASI & PENGUNCIAN ISOLATION & LOCK OUT | Mewajibkan pemasangan <i>personal lock</i> dan <i>tag</i> pada titik isolasi saat melakukan pekerjaan. Require the installation of personal lock and tag at isolation point while working. |
| BEKERJA DI KETINGGIAN WORK AT HEIGHT | Mewajibkan penggunaan <i>platform</i> kerja yang aman seperti <i>scaffolding</i> dan <i>fall protective device</i> . Require the use of secure work platform such as scaffolding and fall protective device. |
| BEKERJA DI RUANG TERBATAS WORK IN CONFINED ROOM | Melarang memasuki atau bekerja di ruang terbatas tanpa surat izin. Prohibit entry or work activity in confined room without a permit. |

Beberapa Komunikasi K3 | K3 Communications [404-3]

KAMPANYE DAN PROMOSI OHS OHS CAMPAIGN AND PROMOTION

Sharing informasi terkait isu-isu keselamatan dan kesehatan secara intranet seperti email, banner, leaflet, sticker dan cinderamata agar karyawan ITM mengetahui dan sadar pentingnya menjaga keselamatan dan kesehatan.

Sharing information regarding health and safety issues through intranet, such as email, banner, leaflet, sticker, and souvenirs to maintain employees' awareness to uphold health and safety.

BULAN K3 OHS MONTH

Pada tahun 2017, ITM melaksanakan bulan K3 dengan Tema 'Dengan Budaya K3 Kita Tingkatkan Kualitas Hidup Manusia Menuju Masyarakat yang Selamat, Sehat dan Produktif'. Didalamnya terdapat serangkaian kegiatan, antara lain: senam bersama, donor darah, Audit 5S "Safety" dan lomba fotografi bertema 'Safety Home'.

In 2017, ITM held 'OHS Month' themed 'Along with OHS Culture we improve the quality of livelihood towards a safe, healthy, and productive community'. During that month, ITM had a series of events, such as gymnastics, blood donor activity, Audit 5S Safety and photograph competetion themed 'Safety Home'.

HEALTH TALK HEALTH TALK

Menyediakan informasi terkait kesehatan yang diberikan oleh dokter perusahaan atau praktisi kesehatan kepada karyawan di kantor pusat dan Site.

Providing information regarding health by doctor from company or health physician to employee in head office and site.

Pencapaian Kinerja K3

Kesungguhan kami dalam memperhatikan aspek K3 di setiap kegiatan ITM membuahkan hasil menggembirakan. Capaian ini salah satunya adalah penerimaan penghargaan *Zero Accident Award* di tingkat Kalimantan Timur oleh PT Indominco Mandiri & PT Kitadin Site Embalut selama 11 tahun sejak 2006.

OHS Performance Achievement

Our commitment in paying attention to OHS aspect in every activity of ITM has yielded encouraging results. One of the achievements was the acceptance of Zero Accident Award in East Kalimantan level by PT Indominco Mandiri & PT Kitadin Site Embalut for 11 years since 2006.

Keterangan I Note

¹Kecelakaan Kerja: tidak ada karyawan perempuan yang mengalami kecelakan kerja. [403-2]

Occupational Accident: no female employees experienced occupational accidents.

- . Ringan: gangguan namun tidak mempengaruhi performa kerja yang menyebabkan 1- 21 hari kerja hilang.
- Minor: health problems but not affecting work performance, causing 1 21 lost day.
- Berat: gangguan kesehatan dan menyebabkan ≥21 hari kerja hilang.

Major: health problems and causing ≥21 lost day.

Fatal: permanent health damage with serious disability or death, causing 6,000 lost day. Base on 555k (p.33), fatal is any accident causing the death of mineworker within 24 hours calculated from the time the accident accurred.

Occupational accident occur at Kitadin Site Embalut mining concession

⁴Nihil di WIUP Kitadin Site Tandung Mayang. Mengingat WIUP KTD Tandung Mayang dalam periode penutupan tambang.

There is zero accident in Kitadin Site Tandung Mayang as its in mining closure period. ⁵TRUST merupakan kontraktor dari WIUP IMM dan WIUP JBG. WIUP TIS belum beroperasi.

TRUST is a contractor of IMM and JBG mining concession. TIS Mining Concession Area has not been in operation.

²Pencatatan IFR, LDR, dan angka kecelakaan kerja dilakukan berdasarkan 1 juta jam kerja mengacu pada KEPMEN 555.K/26/M.PE/1995 dan ketentuan GRI: equal with GRI requirement:

Fatal: kerusakan kesehatan secara permanen dengan kecacatan serius atau kematian yang menyebabkan 6.000 hari kerja hilang. Berdasarkan 555.K (p.33), fatal adalah kecelakan kerja yang menyebabkan karyawan meninggal dunia dalam 24 jam terhitung sejak kecelakaan terjadi.

³Kecelakaan kerja terjadi di WIUP Kitadin Site Embalut.

ITM berkomitmen untuk memenuhi pelaksanaan kesehatan kerja melalui kegiatan *medical check up*, donor darah, kegiatan olahraga, serta pengobatan yang tersedia di 5 klinik *on site*, 3 pos kesehatan, dan lebih dari 10 rumah sakit rekanan di Kalimantan dan Jakarta. Berdasarkan laporan pemeriksaan kesehatan 2017 di Klinik *on-site* dan juga hasil pemeriksaan kesehatan regular tahunan (MCU), ITM memetakan adanya penyakit endemik ISPA dan gangguan profil lemak (*cholesterol*) yang mulai banyak diderita karyawan.

Merespon hasil tersebut, ITM memberikan konsultasi personal di klinik, sosialisasi melalui jaringan intranet, menyediakan fasilitas sanitasi yang baik, serta masker, hingga pengobatan bagi yang membutuhkan.

ITM is also committed to comply with the occupational health implementation through medical check-up, blood donation, sport activities, as well as medical treatment through on site clinic, 7 health posts and more than 10 partner hospitals in Kalimantan and Jakarta. Based on health examination report 2017 at on-site Clinic and result of annual regular Medical Check Up (MCU), ITM mapped the presence of endemic disease of Upper Respiratory Tract Infection (URI) and Lipid Profile Disorder (Cholesterol) that began to influence many employees.

Responding to this issue, ITM conducted personal consultations at the clinic, dissemination through the intranet network, provided proper sanitation facilities, masks, as well as treatment for those who need it.

Sejak 2016, ITM melalui Indominco Mandiri telah melakukan sosialisasi pengendalian HIV/AID melalui *inhouse training* dan *safety talk* kepada 727 peserta karyawan dan penyuluhan kepada 120 peserta dari masyarakat. Komitmen atas ini memperoleh apresiasi Penghargaan Kategori 'Gold' atas Program Pencegahan dan Penanggulangan dari Gubernur Kalimantan Timur.

Since 2016, ITM through Indominco Mandiri has conducted dissemination on HIV/AIDS control through inhouse training and safety talk to 727 employees and counseling to 120 participants from the community. This commitment has earned award of Gold Category for the HIV/AIDS Prevention and Control Program from the Governor of East Kalimantan.

Peningkatan K3 Bersama Perusahaan Mitra Kerja

Menindaklanjuti satu kasus kecelakaan fatal yang melibatkan karyawan perusahaan mitra kerja di tahun 2016, ITM telah meningkatkan kualitas penerapan *Contractor Management System* (CMS). Dengan kerjasama yang terjalin, kinerja K3 menghasilkan perbaikan dengan diraihnya *zero fatality* di seluruh perusahaan mitra kerja.

Pada tahun 2017, sistem pemantauan kinerja K3 anak usaha ITM telah diintegrasikan dengan perusahaan mitra kerja. Integrasi ini menjadikan pemantauan kinerja dilakukan bersama-sama untuk pencapaian prestasi bersama.

Enhanced Joint OHS with Business Partners

Following up a case of fatal accident involving employees of a business partner in 2016, ITM has enhanced the quality of its Contractor Management System (CMS) implementation. With the established cooperation, OHS performance improved with zero fatality achieved in all business partners' companies.

In 2017, ITM subsidiaries' OHS performance management system was integrated with its Business Partners. The integration made the performance monitoring to be jointly performed for common achievement.

PENGEMBANGAN MASYARAKAT

COMMUNITY DEVELOPMENT

ITM melakukan kegiatan pengembangan masyarakat (*Community Development*/CD) melalui 148 kegiatan di 43 Desa. Di antara program CD yang berjalan, 5 program andalan telah memperoleh nilai rata-rata indeks kepuasan masyarakat sebesar 67% atau 'Puas'.

ITM carries out Community Development (CD) activities through 148 activities in 43 villages. Among the current CD programs, five programs have received the average satisfaction index of 67 % or 'Satisfied'.

- 98 Pendekatan Pengembangan Masyarakat Community Development Approach

PENCAPAIAN ACHIEVEMENTS

- Penyerapan dana Realization of CD Budget
- Indeks Kepuasan Masyarakat Community Satisfaction Index ≥67%

Pendekatan Pengembangan Masyarakat

COMMUNITY DEVELOPMENT APPROACH [413-1]

Dalam menyusun peta jalan tanggung jawab sosial dan cetak biru rencana penerapan, serta rencana kerja program pengembangan masyarakat (community development/CD), ITM merujuk pada panduan standar internasional ISO 26000 on Social Responsibility dan AA1000 on Stakeholder Engagement Standard.

In preparing social responsibility roadmap and blueprint of implementation plan as well as work plan of community development (CD) program, ITM refers to international guideline standard ISO 26000 on Social Responsibility and AA1000 on Stakeholder Engagement Standard.

Pendekatan Program Pengembangan Masyarakat melalui Empat Pilar Community Development Approach through Four Pillars

EKONOMI ECONOMY

Perusahaan berkomitmen meningkatkan kesejahteraan masyarakat melalui penyediaan pelatihan dan akses bahan baku.

The Company is committed to improving the community's welfare through the provision of training and access to raw materials.

SOSIAL SOCIAL

Perusahaan mengangkat kualitas hidup dengan memastikan masyarakat mendapatkan layanan publik yang dibutuhkan, berupa kesehatan dan pendidikan secara memadai.

The Company improves the quality of life by ensuring the community receives the required public services, in the form of health and education adequately.

LINGKUNGAN HIDUP ENVIRONMENT

Perusahaan berkomitmen membangun kesadaran masyarakat mengenai pentingnya menjaga dan melestarikan lingkungan sekitar.

The Company is committed to building community awareness on the importance of maintaining and preserving the surrounding environment.

HUBUNGAN KEMASYARAKATAN COMMUNITY RELATIONS

Perusahaan selalu berupaya menyelaraskan pandangan pemangku kepentingan untuk dapat saling memahami dan terbangunnya kebersamaan.

The Company always strives to align the stakeholders' views to understand and build togetherness.

Berdasarkan empat pilar pengembangan masyarakat, ITM mengembangkan program pengembangan masyarakat berdasarkan 6 bidang, yaitu: ekonomi, pendidikan, sosial budaya, kemasyarakatan, kesehatan, lingkungan hidup, dan infrastruktur.

Based on the four pillars of community development, ITM develops community development program based on 76areas: economy, education, social, cultural and comunity, health, the environment, and infrastructure.

Proses Pengembangan Program CD:

Process on Developing CD Program:

BAGIAN-BAGIAN KEGIATAN SUB-ACTIVITY

Cakupan Wilayah Program Pengembangan Masyarakat

ITM melaksanakan program-program pengembangan masyarakat di semua wilayah operasi pertambangan, yaitu 7 wilayah izin usaha penambangan yang terdiri dari 3 provinsi, 5 kabupaten, 1 kota, 10 kecamatan, dan 43 desa.

Coverage of Community Development Program Areas

ITM conducts community development programs in all mining operations areas, consisting of seven mining business license area in three provinces, five regencies, one city, 10 districts, and 43 villages.

Lokasi Pengembangan Masyarakat | Community Development Locations

5 JORONG BARUTAMA GRESTON

Kalimantan Selatan, Kab. Tanah Laut (1 Kecamatan dan 6 Desa)

6 BHARINTO EKATAMA

Kalimantan Timur & Kalimantan Tengah Kab. Kutai Barat dan Kab. Barito Utara (3 Kecamatan dan 6 Desa)

7 TEPIAN INDAH SUKSES

Kalimantan Timur, Kab. Kutai Barat (1 Kecamatan dan 1 Desa)

Forum Konsultasi Masyarakat

[413-1

Dalam membentuk program pengembangan masyarakat, ITM memiliki Forum Konsultasi Masyarakat (FKM) sebagai jembatan komunikasi masyarakat dengan ITM. Pertemuan FKM dengan perusahaan untuk berdiskusi dilaksanakan minimal setiap satu tahun sekali untuk mengevaluasi kegiatan CD. FKM terdiri dari tokoh agama, pemuda, kader PKK, dan aparat desa yang dipilih sendiri oleh warga. Hingga tahun 2017, terdapat 43 FKM yang tersebar di desa-desa dampingan di wilayah operasi perusahaan.

Untuk memfasilitasi program-program pengembangan, ITM memiliki community development officer (CDO) sebagai perwakilan perusahaan yang mendampingi setiap pelaksanaan program, baik di tingkat ITM maupun anak perusahaan. Selama tahun 2017, terdapat 38 orang personel CDO.

ITM berkomitmen untuk terus meningkatkan kompetensi personel CDO agar dapat memberikan pendampingan yang berkualitas pada masyarakat melalui berbagai pelatihan, diantaranya:

- 1. Pelatihan dasar pemetaan sosial dan pemetaan pemangku kepentingan
- 2. Penyusunan grand desain program dan bisnis model
- 3. Keterampilan untuk negosiasi dengan penduduk asli
- 4. Pelatihan Holistic Person Development System (HOPES)

Hingga tahun 2017, ITM telah melaksanakan 148 kegiatan pengembangan di seluruh wilayah operasional anak perusahaan, yang jumlahnya menurun dibandingkan tahun sebelumnya. Penurunan disebabkan karena beberapa kegiatan belum terlaksana di tahun 2017 dan Perusahaan telah mencadangkan anggaran yang belum terpakai ke tahun berikutnya.

Community Consultative Committee [413-1]

In establishing community development programs, ITM has a Community Consultative Committee (CCC) as a bridge of communication between community and ITM. The Community Consultative Committee convenes with the Company for discussion at least once a year to evaluate CD activities. The FKM consists of religious leaders, youth, PKK cadres, and village officials who are elected by the residents. Until 2017, there have been 43 FKMs scattered in the assisted villages in the Company's operating areas.

To facilitate development programs, ITM has a community development officer (CDO) as the company's representative who accompanies every program implementation, both at the ITM level and its subsidiaries. During 2017, there were 38 CDO personnel.

ITM is committed to continuously improve the competence of CDO personnel in order to provide quality assistance to the community through various training programs, including:

- 1. Basic social mapping training and stakeholder mapping
- 2. Preparation of grand design program and business model
- 3. Negotiation skills with indeginous community
- 4. Holistic Person Development System (HOPES) Training

Until 2017, ITM has implemented 148 development activities at all operating areas of subsidiaries, whose numbers decreased compared to the previous year. The decrease was due to several activities not yet implemented in 2017 and the Company has reserved the unused budget to the following year.

PELAKSANAAN KEGIATAN PENGEMBANGAN MASYARAKAT

IMPLEMENTATION OF COMMUNITY DEVELOPMENT ACTIVITIES [413-1]

Pelaksanaan pengembangan masyarakat dilakukan berdasarkan hasil pemetaan sosial dan asesmen dampak sosial. Pemetaan ini melibatkan pihak independen, pemerintah daerah dan masyarakat setempat. Program diprioritaskan untuk memenuhi kebutuhan masyarakat, terutama masyarakat yang tertinggal dan rentan.

Community development is implemented based on the result of social mapping and social impact assessment. This mapping involves independent parties, local government and local communities. Programs are prioritized to meet the community's needs, especially the disadvantaged and vulnerable communities.

| Pembangunan Sarana Air bersih di Santan Tengah, Kutai Kartanegara dan Penyediaan air minum isi ulang di Benangin V, Bharito Utara. Development of Water Facility in Central Santan, Kutai Kartanegara and supply of drinking water refill in Benanging V, North Barito | Terpenuhinya rumah tangga yang sulit air bersih mendapat akses air bersih dan air minum Fulfillment of clean water supply for households that have difficulties in accessing clean water and drinking water | Telah terbangunnya terminal air bersih yang dapat menyambungkan air kepada 230 kepala keluarga (KK) di site IMM Clean water terminal has been established that distributing water to 230 families at IMM site Menyediakan air minum isi ulang kepada 942 jiwa di site BEK. Provide drinking water refill to 942 people at BEK site |

Pusat Kegiatan Belajar Masyarakat (PKBM)

ITM berkomitmen untuk menyediakan kesempatan pendidikan yang berkualitas bagi masyarakat. Komitmen tersebut diwujudkan dalam pembentukan pusat kegiatan pembelajaran masyarakat (PKBM). Kurikulum yang diajarkan adalah Kejar Paket A (setara SD), B (setara SLTP), dan C (setara SLTA), serta peningkatan keterampilan dan pemberdayaan perempuan.

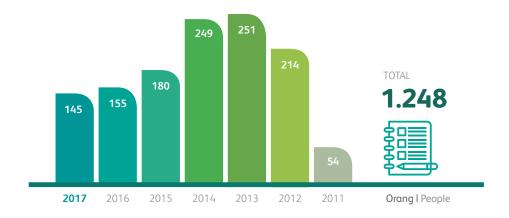

Program PKBM memberikan dampak positif bagi masyarakat berupa kesadaran terhadap manfaat belajar dan memiliki pengetahuan umum. Selain itu, masyarakat yang semula buta huruf menjadi dapat membaca dan menulis serta memiliki keterampilan kreatif, seperti membuat kerajinan tangan. Penerima manfaat yang mengikuti PKBM diharapkan dapat memiliki kompetensi dasar untuk melakukan kegiatan produktif, mengembangkan kegiatan wirausaha, dan siap memasuki lapangan kerja. Hingga tahun 2017, ITM melalui IMM telah mengembangkan 3 PKBM yaitu PKBM Malahing, PKBM Damai Mandiri dan PKBM Salaka.

Community Learning Center (PKBM)

ITM is committed to provide opportunities of quality education for community. The commitment is realized in the community learning center (CLC). The curriculum of education provided are Kejar Paket A (equivalent to elementary school), B (equivalent to junior high school), and C (equivalent to senior high school), as well as skill improvement and women empowerment.

CLC program provides positive impact for community in the form of awareness of the benefit of learning and possessing general knowledge. In addition, the community who were illiterate before, has become literate and having creative skills, such as making handicrafts. The beneficiaries who attended CLC is expected to have basic competencies to conduct productive activities. Until 2017, ITM through IMM has developed 3 CLCs, CLC Malahing, CLC Damai Mandiri and CLC Salaka.

Jumlah penerima manfaat Baca Tulis dan Keterampilan Hidup I Total beneficiaries of Literacy and Life Skills

Target program PKBM pada tahun 2017-2020 selanjutnya adalah memberikan paket A, B, C bagi 757 penerima manfaat dan menurunkan penerima program keaksaraan fungsional menjadi nihil, yang menunjukkan bahwa tidak ada lagi masyarakat yang buta aksara.

CLC program target in 2017-2020 is to provide packages A, B, C for 757 beneficiaries and lower the beneficiaries of literacy program to zero, which indicates there is no longer illiteracy in the community.

Air Bersih dan Sanitasi

Dalam menjamin ketersediaan air bersih dan sanitasi yang layak bagi masyarakat, ITM melalui IMM menyediakan akses layanan air bersih di Desa Santan Tengah, Kutai Kartanegara. Penyaluran air bersih tersebut dilakukan melalui BUMDES Program "Air Bersih untuk Kehidupan" Santan tengah.

Program penyediaan air bersih ini dimulai sejak tahun 2013, dengan memasang pipa yang menjangkau 40 rumah dan 230 kepala keluarga (KK).

Clean Water and Sanitation

In securing clean water supply and proper sanitation for the community, ITM through IMM provide access to clean water in Santan Tengah Village, Kutai Kartanegara. The clean water supply is distributed through BUMDES program "Clean Water for Life" in Santan Tengah.

The provision of clean water program has started since 2013, with pipe installation that reach 40 homes and 230 families.

Realisasi Program 'Penyediaan Air Bersih untuk Kehidupan 'I Realization of 'Clean Water Supply for Life' Program

| JUMLAH AIR DISALURKAN TOTAL VOLUME OF WATER DISTRIBUTION m³/hari I m²/day | 184 | 160 | 120 | 32 | 16 |

Dengan adanya aliran air bersih, maka masyarakat tidak lagi menggunakan air keruh. Selain itu, masyarakat lebih mudah menjangkau sumber air karena adanya tandon (penampungan air dan pipa), dibandingkan sebelumnya harus menempuh jarak jauh untuk mengambil air di sungai atau membeli air.

Selain menyediakan air bersih bagi masyarakat, program ini juga memperhatikan pengelolaan dengan prinsip konservasi air, pemberian pelatihan tentang air bersih kepada masyarakat, dan pemeliharaan infrastruktur yang baik.

With the clean water supply, the community no longer used turbid water. It is easier for community to access water source with the availability of water tank and pipe installation, compared to having to go far to withdraw water in the river or buy water.

Aside from providing clean water for the community, this program also considers the management with water conservation principle, organizing training on clean water for community, and proper maintenance of infrastructure.
